Re: Eagle Harbor Water System Improvements
Pre-blast Survey

Dear Resident,

Moyle Construction will be contracting with a drilling and blasting company to drill and blast in various areas around Eagle Harbor as part of the upgrades to the water system. We anticipate starting this work the week of June 28, 2010. We plan on blasting between 8:30 am and 4:30 pm and should complete the work within four to six weeks depending on weather and site conditions.

Safety is our main priority and we take measures to insure this criteria is met. Our subcontractor employs licensed and experienced blasters, maintains seismograph records from each blast. Moyle Construction will make every effort to ensure as little disruption as possible to your day-to-day activities.

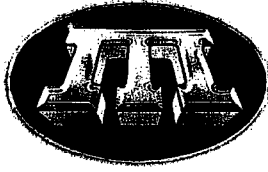

Per contract requirements, Moyle Construction will conduct a pre-inspection of your residence during the week of June 21, 2010 between 6:00 am and 6:00 pm Monday through Friday and 6:00 am and 12:00 pm Saturday. Eric Laitinen, Moyle's on-site superintendent, and a representative from Traverse Engineering, Eagle Harbor Water Project Engineer of Record, will perform the survey and present identification. Moyle Construction would appreciate your cooperation by letting us know what date and time you would be available for a pre-inspection. Please complete the attached form and return to Moyle Construction by Friday June 18, 2010. This form can also be returned to the Eagle Harbor Township office. If the property owner cannot be present during the time of the inspection during the week of June 21, 2010, then a representative must be appointed to act upon your behalf.

If you do not contact Moyle Construction to arrange an inspection, Moyle Construction will not be held responsible for any potential claims or damages caused by blasting operations.

If you have any questions concerning the work and wish to contact us with questions or to notify us for scheduling, please feel free to contact me between 8:00 a.m. and 5:00 pm. Monday through Friday at (906) 483-7946, (906) 483-3507 (fax), or plbaranowski@moyleusa.com.

Sincerely,

Phil Baranowski
Project Manager
